PROJECTS

EASY ACCOUNTING

PROJECT SCOPE

The purpose of the EASY ACCOUNTING is to ease transactions in a e commerce site application for customers trying to buy a project The system is based on a relational database with its javascript and nodejs implementations.We will have a database server supporting the customer to buy there required product from the company Above all, we hope to provide a comfortable user experience.

Smart Parking System Using Raspberry Pi
project aims to create an automated parking lot where cars are registered for
parking spots based on their license plate numbers. The license plates are captured by
a camera fitted near the entrance to
the parking lot.
This data is
then sent to the
Raspberry Pi. The
Pi processes
this
image by using
an external,
web-based API,
OpenALPR.

SKILLS
Languages
C, C++, Python, Java, HTML, CSS, Javascript, R, SQL
Frameworks
Tensorflflow, Scikit-learn, PyTorch, keras, Node.js, Express
Tools
Spyder, Jupyter, Anaconda, Virtual Studio Code, Google Colab, Kaggle, Git
Soft Skills
Time Management, Teamwork, Communication, Problem Solving, Accountability
EDUCATION
BTech in Computer Science with Spec. in Data Sc., Vellore Instistute of Technology, Vellore May 2023
Higher Secondary Education, MDS Sr. Sec School, Udaipur May 2019
Senior Secondary Education, Alok Public School, Udaipur June 2017
HOBBIES
Cycling, Cricket,Drama, Music, Working out, Movies,Video Editing
